

Cambridge Cardio - Respiratory Research Institute

Client
Papworth Hospital NHS Foundation Trust and Cambridge University

Completion
2010

Project description
Llewelyn Davies was appointed to develop a detailed brief and concept design for a Research & Education building connected to the new Papworth Hospital.

The detailed brief included Room Data Sheets and a Schedule of Accommodation. The Concept Design included 1:200 detailed layouts for all areas, as an 'exemplar' for a Design and Build contract. The building will contain 7,500m² of research laboratories, support facilities, administrative offices, seminar rooms, lecture theatre and an in-patient Clinical Trials Unit.

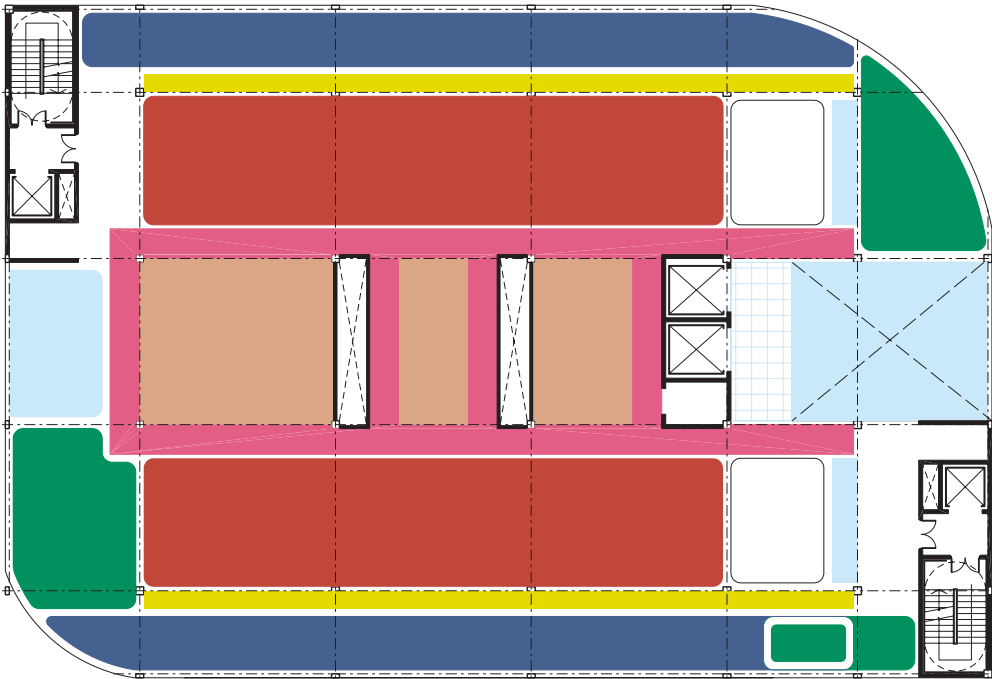

Client representatives, from Cambridge University Medical School, Papworth Hospital and Cambridge University Estates Management & Building Service, formed a Key Stakeholders Briefing group. A series of workshops enabled the formulation of the brief and selection of example concept options. Discussions were also held with laboratory managers and technicians.
